

MX49/MX61 Voice List Installation Guide

【1】Start Cubase on your computer.

Click [Devices] menu → [MIDI Device Manager].

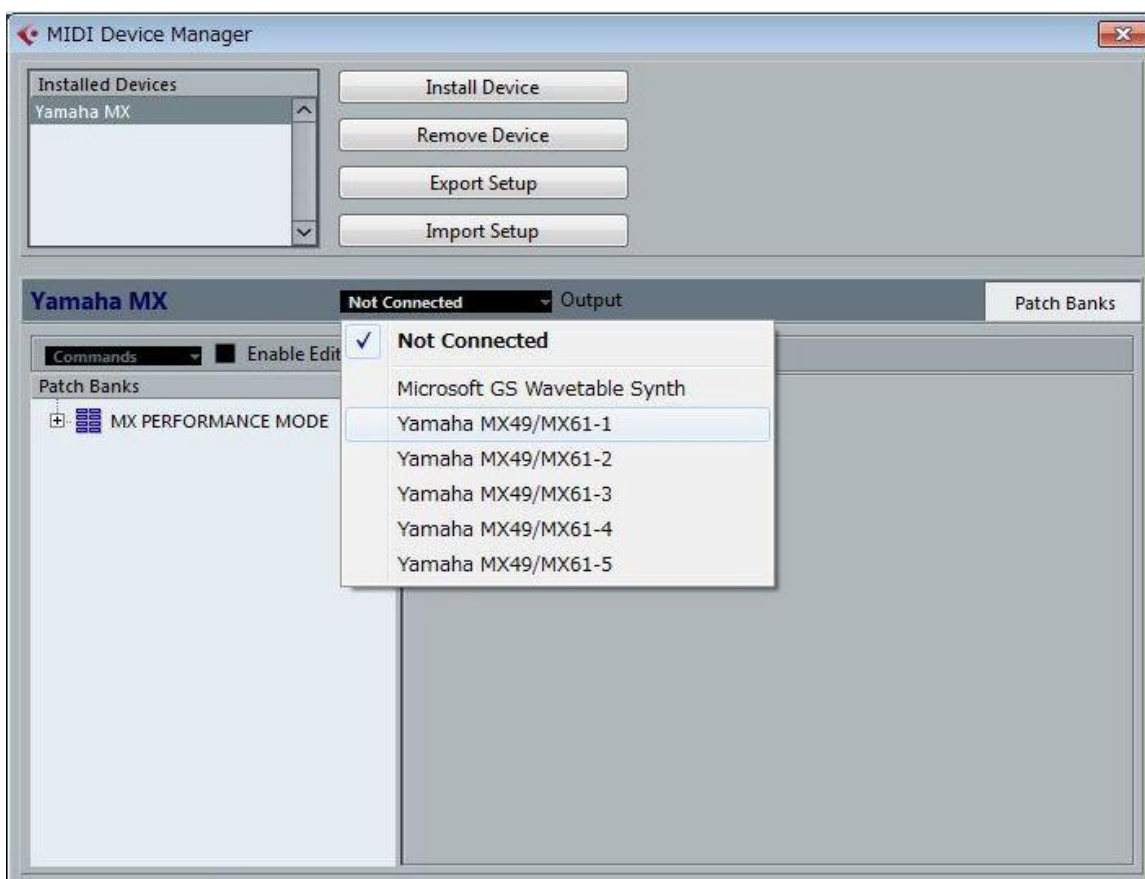

【2】Click [Import Setup] and open "MX49_61.xml" file.

【3】Click [OK] to close Import window.

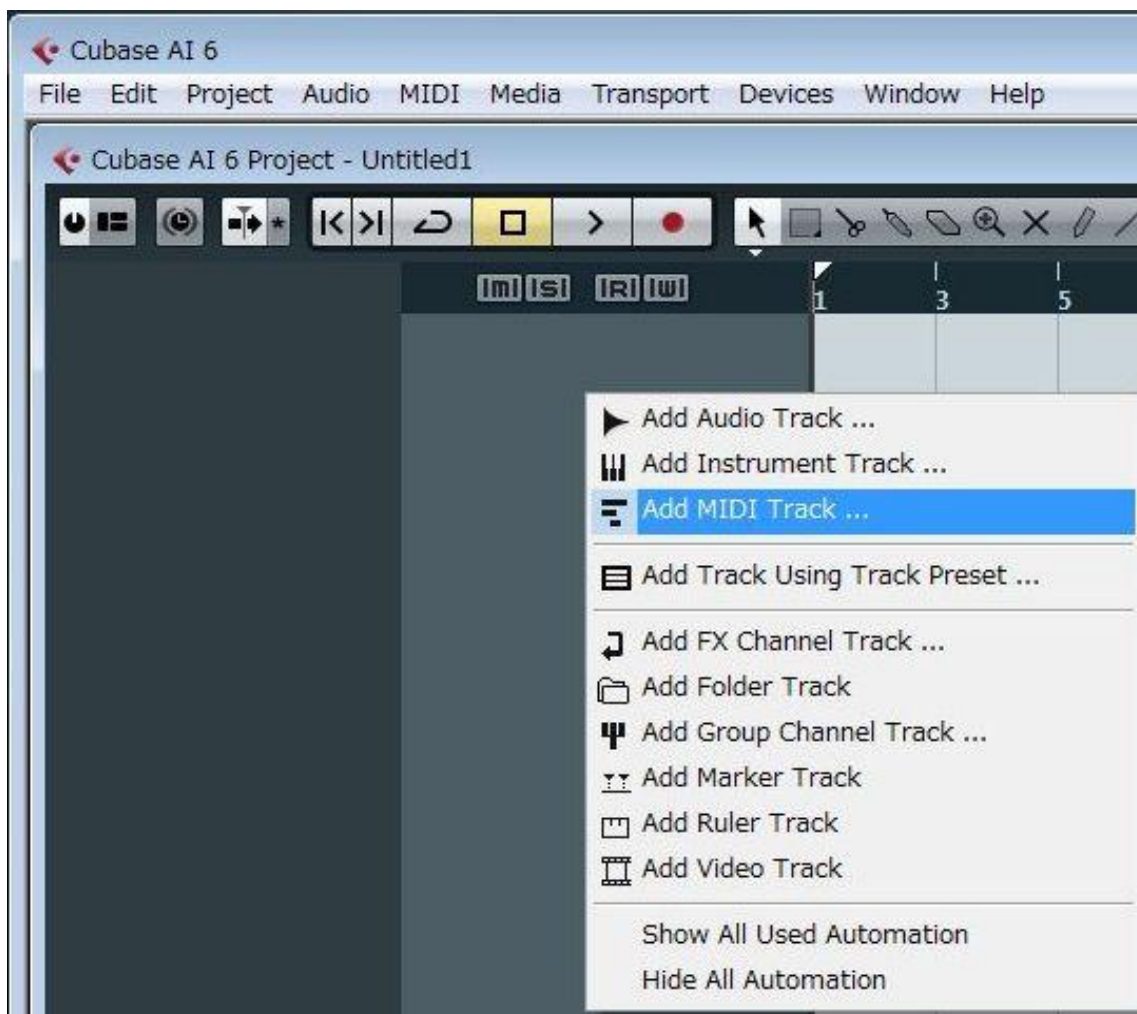

【4】After selecting “Yamaha MX” in the “Installed Devices” area on the MIDI Device Manager window, set output to “Yamaha MX49/MX61-1” at the lower part of the window, then close the window.

If you finish all above, you can skip No.5 'Set up the MX Voice List Installed in your computer for use on Cubase' on the page 24 of Reference Manual.

【5】Create a MIDI track.

【6】Set the Input Routing to “All MIDI Inputs” and set the Output Routing to “Yamaha MX49/MX61 (Yamaha MX49/MX61-1)”.

【7】Click in the Program Selector to call up the MX49/MX61 Voice List, then select the desired Voice. Click each category to find Preset Voices.
