## List of tested PC card adapters for Compact Flash memory used with PM5D series

Yamaha Corporation

PC flash ATA cards compliant with PCMCIA Type II or a Compact Flash memory inserted in PC card adapters can be used for saving/loading data, or updating the firmware in PM5D series.

These functions require the following memory specifications:

- The maximum capacity is 2GB.
- The compliant format is FAT16.

Some PC card adapters may not work properly in the console.

To help users find a working PC card adapter, Yamaha has provided a list of tested adapters.

However, please note the following points:

- The list is a result of a few basic tests, so please note that we assume no responsibility whatsoever for any damages resulting from the use of the PC card adapters listed in the “Compatible list”.
- Please refer to each manufacturer for the specification of each PC card adapter.
- The devices listed have passed Yamaha’s basic tests.  
Test conditions are:
  - Reading of data in firmware update mode
  - Reading /writing of data in normal mode
- Information in this document is subject to change without notice.

Compatible/Incompatible list

Manufacturer	Product Name	Result	Date of Test
