

DME7/DME5/DME3 OSC Specifications

Version 3.0.0

This specification document applies to DME7/DME5/DME3 Firmware V3.00 and later.

OSC (Open Sound Control) is a protocol for transmitting control information of electronic musical instruments / audio equipment, etc. via a network. This protocol can be used to remotely control the DME*. This document describes the connection and setup procedure for remote control using this protocol and lists the necessary parameter information.

* In this document, "DME" refers to DME7, DME5, and DME3.

Table of contents

0. Revision History	2
1. Setup	3
1.1. Connection Procedure	3
1.2. DME Configuration.....	3
1.3. Configuring the Remote Controller	3
1.4. Configuration Examples	3
1.4.1. Parameter setting examples	3
1.4.2. Snapshot setting example.....	3
2. Parameter	4
2.1. Parameter List.....	4
2.2. Parameter Value Detail.....	13
2.2.1. Ambient Noise Compensator	13
2.2.2. Auto Gain Control.....	13
2.2.3. Combiner.....	14
2.2.4. Dynamics	14
2.2.5. REV-X	16
2.2.6. EQ	17
2.2.7. Filter	18
2.2.8. Mixer	18
2.2.9. Oscillator	18
2.2.10. Standard SPP/C-Series SPP (FIR).....	18

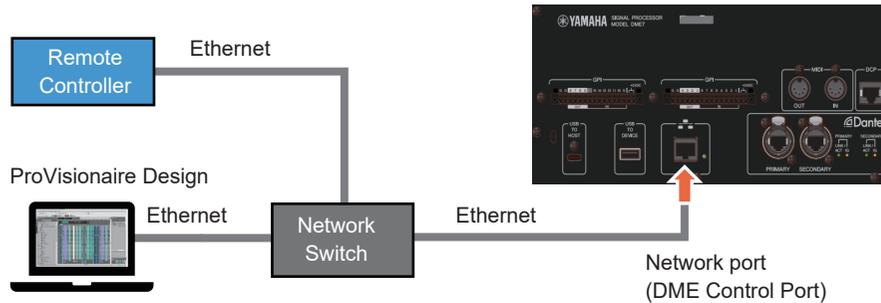

0. Revision History

Version	Date	Section	Description
V1.0.0	Dec. 23, 2022	-	Initial version
V1.1.1	Jun. 11, 2025	-	Updated the supported firmware version for DME7
		1.4.1	Correction of typographical errors
V3.0.0	Feb. 1, 2026	-	Added DME5/DME3.
		2.1	Added Audio Component Analog IN, Analog OUT, Flex IN, Flex OUT, USB Memory, and Speech Privacy
		2.1	Added trigger parameters to the Control Component.

1. Setup

1.1. Connection Procedure

Connect each devices via the network terminal as shown below. The device to be controlled is specified by its IP address. Up to 8 remote controllers can be connected to one DME.

1.2. DME Configuration

IP address setting:

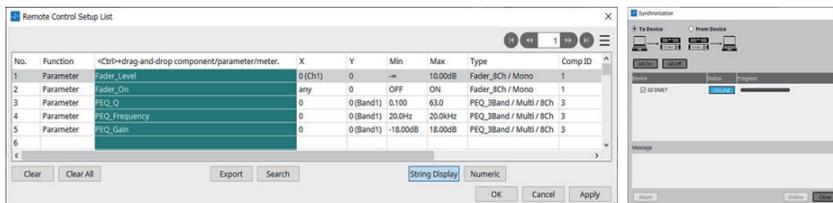

Press the MENU/HOME key on the front panel, select Settings > IP Settings > DME Control Port, then specify the Network Mode, IP address, and subnet mask.

* They can also be set on ProVisionaire Design.

Remote Control Setup List setting:

DME parameters can be controlled after registering the parameters on the Remote Control Setup List of ProVisionaire Design and synchronizing and saving those settings on the DME. See the ProVisionaire user manual for details.

1.3. Configuring the Remote Controller

DME can be controlled from an external device via Ethernet (Network terminal). The settings on the remote controller side for each connection are as follows -

IP Address: Specify the IP address of the DME Control Port.

IP Port No.: UDP 49900

1.4. Configuration Examples

Below are several example commands set using an OSC Controller, in this case with the QLab application. QLab does not require type tags to be added to the command. A type tag may be required depending on the OSC Controller application, please check this for the OSC controller to be used.

1.4.1. Parameter setting examples

Set the Ch2 Level of the Fader component (4Ch) registered on No.1 in the Remote Control Setup List to -∞

Category	Parameter Description	<Action>	<Address>	<X>	X name	<Y>	Y name	<type tag>	type tag	<value>		value	comment	
										min	max	scaling	unit	
Fader	Level	set	PROC:Remote/<IndexNo>	1	-	1	-	:	int	-13801	1000	100	dB	-Infinity - +10dB

Format: /yosc:req/<Action>/<Address>/<X>/<Y> <value>

Command: /yosc:req/set/PROC:Remote/1/1/1 -13801

* Specify "1" to X and Y for parameters with specified X and Y registered on the Remote Control Setup List.

* Specify a value to X and Y for parameters registered by specifying X and Y as "any" on the Remote Control Setup List.

* Specify the index number of the Remote Control Setup List for <IndexNo> in the <Address> argument of the command.

1.4.2. Snapshot setting example

Recall Snapshot No.10 of the Parameter Set ID 5000

Category	Parameter Description	<Action>	<type tag>	type tag	<value 1>		<value 2>		comment
					min	max	min	max	
Snapshot	Recall snapshot	ssrecall_ex	si:	string, int	"1"	"65535"	1	100	-

Format: /yosc:req/<Action> <value1> <value2>

Command: /yosc:req/ssrecall_ex "5000" 10

2. Parameter

2.1. Parameter List

Audio Component

Format: /yosc:req/<Action>/<Address>/<X>/<Y> <type tag> <value>

Category	Parameter Description	<Action>	<Address>	<X>	X name	<Y>	Y name	<type tag>	type tag	<value>		value		Comment
										min	max	scaling	unit	
Dante Out	Polarity	set	PROC:Remote/<IndexNo>	1 - 16	Offset	1	-	i:	int	0	1	-----	-----	0: NORMAL, 1: INVERTED
Dante Out	Gain	set	PROC:Remote/<IndexNo>	1 - 16	Offset	1	-	i:	int	-9600	2400	100	dB	
USB Out	Polarity	set	PROC:Remote/<IndexNo>	1 - 8	USB Out	1	-	i:	int	0	1	-----	-----	0: NORMAL, 1: INVERTED
USB Out	Gain	set	PROC:Remote/<IndexNo>	1 - 8	USB Out	1	-	i:	int	-9600	2400	100	dB	
Analog In	+48V	set	PROC:Remote/<IndexNo>	1 - 8	In	1	-	i:	int	0	1	-----	-----	(Only for DME5/DME3)
Analog In	Gain	set	PROC:Remote/<IndexNo>	1 - 8	In	1	-	i:	int	0	6600	100	dB	(Only for DME5/DME3)
Analog Out	Polarity	set	PROC:Remote/<IndexNo>	1 - 8	Out	1	-	i:	int	0	1	-----	-----	(Only for DME5/DME3) 0: NORMAL, 1: INVERTED
Analog Out	Gain	set	PROC:Remote/<IndexNo>	1 - 8	Out	1	-	i:	int	-9600	2400	100	dB	(Only for DME5/DME3)
